

Cruise Details

Name:	Expedition Norway And North-West Svalbard: Arctic Adventure As Far As The Ice Edge
Reference:	HAPAGNAT2814
Operator:	Hapag-Lloyd Cruises
Cruise Type:	Ocean
Cruise Rating:	Expedition
Ship:	HANSEATIC nature
Regions:	Arctic
Departs On:	23 Jun 28
Departs From:	Hamburg
Arrives On:	08 Jul 28
Arrives At:	Longyearbyen
Cruise Nights:	15
Total Vacation Days:	16

Itinerary

Day 1: Hamburg (Germany)

Arrives On: 23 Jun 28

Day 3: Bergen (Norway)

Bergen welcomes you to a Scandinavian gem. Over the years, the city's wealth has been built on seafaring, trade and fishing. Today, the city's past is reflected in the Hanseatic quarter of Bryggen with its narrow streets: with its colourful, historic merchants' houses lined up next to one another on the quayside, the area has been designated a UNESCO World Heritage Site. The picturesque fish market is also worth a visit. Mount Floyen, one of the city's seven hills, rises up to 300 m (984 ft) above the centre – on a walk you will see from the top why Bergen is known as the "gateway to the fjords".

Arrives On: 25 Jun 28

Day 4: Geiranger (Norway)

Your small expedition ship will also take you to the famous Geirangerfjord as it hugs the coastline. The UNESCO World Heritage Site seems unreal and will draw you under its spell with its majestic mountains and cliffs rising up to 1,000 m (3,280 ft) out of the water. Numerous waterfalls plunge into the fjord, including the “Seven Sisters” with a drop of 250 m (820 ft). Legend has it that the “Suitor” waterfall on the opposite bank had its eye on the beautiful sisters, but its desires remained unfulfilled because of the fjord that kept them apart. Out of frustration, it took to the bottle, which is now apparently reflected in its shape like a liquor bottle. You too will be intoxicated by the sight of this natural wonder, which will stay in your memory forever. From the little town of Geiranger at the end of the fjord, you can take the opportunity to go on a variety of excursions*.

Arrives On: 26 Jun 28

Day 5: Torgshatten, Toget Island (Norway)

Norway is legendary in the truest sense of the word. Many of its impressive landscapes are closely linked with legends and Norwegian mythology. A particularly fascinating story comes to life when your ship heads for Torgshatten, the striking mountain with a hole in the middle. According to legend, this hole was created when the King of the Somna's hat was pierced by an arrow fired by a wild troll prince. See it for yourself when you walk through the hole and enjoy breathtaking views of the surrounding coastal scenery and the sea. Your team of experts on board will explain the actual story behind the special geological feature.

Arrives On: 27 Jun 28

Day 6: Stokmarknes (Norway)

Discover charming Stokmarknes, a coastal town in the Vesteralen archipelago, north-east of the Lofoten Islands. Nature and culture come together in a special way here: surrounded by majestic mountains and deep-blue coastal waters, the region invites visitors to explore nature on foot or with binoculars – it is home to eagles, whales and seabirds. Authentic encounters with coastal culture, northern Norwegian hospitality and deep-rooted seafaring traditions await you. Stokmarknes is the birthplace of Norway's famous postal ship line, which also has its own museum dedicated to it. An active hike accompanied by experts will take you to the nearby local mountain Storheia: at a height of around 500 m (1,640 ft), you can enjoy a stunning 360-degree view of the islands and the open sea.

Arrives On: 28 Jun 28

Day 6: Port information not found

A spectacular backdrop opens up as you cruise through Trollfjord, whose entrance is only 100 m (328 ft) wide. The fjord lies on the border between the Lofoten Islands and the Vesteralen archipelago. Only a very small ship can explore the 2 km (1.2 mi.) long inlet with its peaks towering up to 1,100 m (3,608 ft). Slowly glide through this still life of the last ice age, created by glacial erosion – glaciers once carved deep into the rock, leaving behind a majestic valley that was flooded by the sea. With luck, you will spot sea eagles hunting for fish. A peaceful sight in contrast to the heated conflict that took place here in 1890: the Trollfjord conflict. Traditional fishermen resisted the blockade of their fishing grounds by modern steamships. They prevailed, and the conflict contributed to parliament later banning bottom trawling in the Lofoten Islands.

Arrives On: 28 Jun 28

Day 7: Andenes (Norway)

Andoya is the northernmost island of the Vesteralen archipelago and a fascinating destination for nature lovers and explorers. Dramatic coastlines, expansive moors, white beaches and towering mountains define the landscape. Off the coast, the seabed drops to a depth of 1,000 m (3,281 ft) – an ideal habitat for sperm whales, which may surface here in search of octopus. The town of Andenes in the north is the starting point for whale watching trips, where with a bit of luck you may also see orcas and humpback whales. Enjoy sweeping views from the 160-year-old lighthouse and learn more about Norway's coastal and lighthouse history. Space travel also has its place on the island: research rockets and satellites have been launched from the Andoya Space Center since the 1960s.

Arrives On: 29 Jun 28

Day 8: Tromsø (Norway)

You will arrive in Tromsø in the evening. At the time of the midnight sun, the special light of northern Norway bathes the city in a warm orange-red colour until late at night. The ship will stay overnight – ideal for enjoying the atmosphere at your leisure. Perhaps you will choose to spend the evening in one of the restaurants in the former warehouses on the quay. The wonderful view from on board will also increase your joyful anticipation of the discoveries that await you the following day.

Arrives On: 30 Jun 28

Day 9: Tromsø (Norway)

Once described by seafarers and polar explorers as the "Paris of the North", Tromsø has not lost any of its charm to this day. A lively city in idyllic natural surroundings. Playground of the midnight sun in summer and dance floor of the Northern Lights in winter. The city's landmark, the Arctic Cathedral, is a prime example of how strong an influence the Arctic has on the city's architecture.

Aluminium-coated concrete panels give the roof its striking design, making it look as if ice floes have been pressed up on both sides. The 23 m (75 ft) high stained-glass window is also impressive. The exhibitions at the Polaria centre and the Arctic fish and other species at the aquarium will enhance your knowledge of the polar habitat. A number of museums bring to life the legendary polar explorers, for whom Tromsø was the “gateway to the Arctic”.

Arrives On: 01 Jul 28

Day 9: Honningsvåg (Norway)

Honningsvåg is the maritime centre of the North Cape region. Its colourful houses are huddled together on the slopes of the local mountain, Storfjellet, which stands at a height of around 300 m (984 ft). Walk from the port to the little shops and restaurants offering Nordic specialities or visit the church built in 1885. When the town was destroyed by German occupying forces in 1944, only the whitewashed church remained undamaged. Take a hike in the surrounding hills to appreciate the idyllic sight of the town today. Honningsvåg is also a starting point for visiting the legendary North Cape. Here, black slate cliffs rise up about 300 m (984 ft) out of the sea and are topped by a huge globe symbolically marking the end of the European mainland. The rugged beauty of the countryside, combined with the powerful waves in the sea, create an unforgettable atmosphere when your ship cruises off the legendary North Cape. The North Cape is a geographical point, as well as a symbol of the spirit of adventure that will also come to life in you.

Arrives On: 01 Jul 28

Day 11: Svalbard Archipelago (Svalbard and Jan Mayen)

On an adventure in north-west Svalbard, feel the connection with Willem Barents, who discovered the archipelago in 1596. Now, more than 430 years later, you can still expect some stunning expedition experiences on your cruise to the ice edge. Where the route is determined by nature, the weather and the ice, the crew's many years of polar experience and the highest ice class for passenger ships are what really count. Time and again, you will head off in the Zodiacs to admire icy glacial cliffs or go ashore in remote bays. Your team of experts will provide captivating background knowledge during lectures on board and on numerous walks. With a little luck and from a respectful distance, you will be able to spot polar bears, whales, Arctic foxes and walrus. Forge your way along deserted coasts like the great pioneers before you and visit Hornsund, where hundreds of thousands of little auks live on the shores. Blubber ovens, houses and graves are the main remnants of the early European whale industry here: some 50 whaling stations were registered in Svalbard. This site is one of the oldest and comes from a time when whaling was still operated from the shore. Prins Karls Forland is an extraordinarily long island, mostly glaciated on the north-eastern side. The wild mountain scenery includes several peaks over 1,000 m (3,280 ft). The land is very barren in the open, with the tundra becoming bright green only near cliffs full of birds. Unforgettable wildlife sightings await on the gently sloping coastline, where

walrus like to relax – a great photo opportunity for you. The small settlement of Ny-Alesund is known for great polar history and international research. The world's northernmost year-round research station is devoted to meteorology and research into global warming and the Northern Lights. Around 30 people live here in the winter and about 120 people in the summer. In Ny-Alesund you can find the world's northernmost post office. In the Liefdefjord, the majestic Monacobreen glacier will catch your eye. Blocks of ice keep falling into the fjord from the 5 km (3.1 mi.) wide front. Take a look from the deck or from a Zodiac. The glacier was named in honour of Prince Albert I of Monaco, who explored the area in 1906 and 1907 with Gunnar Isachsen. The Arctic leaves nobody out in the cold – especially not at the thermal springs at Bockfjord. Limestone sinter terraces have formed around the hot springs, the only place you can see them in Spitsbergen. The water in the springs is groundwater, which is so hot that the temperature at the surface stays above 20 °C (68 °F) all year round. The Raudfjord will surprise you with its colourful accents and mountain slopes that shimmer in a striking red. These red sandstone mountains are what give the fjord its name, meaning "red fjord". Go ashore with the Zodiacs and enjoy the Arctic silence and solitude.

Arrives On: 03 Jul 28

Day 16: Longyearbyen (Svalbard and Jan Mayen)

Arrives On: 08 Jul 28
