Cruise Details

Name:	Expedition Antarctica: Antarctic Circle (Intensive)
Reference:	HAPAGSPI2801
Operator:	Hapag-Lloyd Cruises
Cruise Type:	Ocean
Cruise Rating:	Expedition
Ship:	HANSEATIC spirit
Regions:	South America
Departs On:	03 Jan 28
Departs From:	Ushuaia
Arrives On:	23 Jan 28
Arrives At:	Ushuaia
Cruise Nights:	20
Total Vacation Days:	21

Itinerary

Day 1: Ushuaia (Argentina)

Arrives On: 03 Jan 28

Day 3: Falkland Islands (Falkland Islands (Malvinas))

The British overseas territory has more than just a turbulent history; discover its impressive birdlife. Experience this unique ecosystem, which is home to around 60 species, during Zodiac landings. Together with your experts, you can observe rockhopper and Magellanic penguins, who share their habitat with kelp geese, striated caracaras, king cormorants as well as black-browed and wandering albatrosses. Natural history walks take you past the island's typical dwarf shrubs and tall tussock grass. The first human footprints on the Falkland Islands date back to 1690, and it wasn't until 1764 that the first settlement was established.

Arrives On: 05 Jan 28

Day 6: South Georgia Island (South Georgia and the South Sandwich Islands)

Days of adventure and great experiences lie ahead of you, when rugged peaks on the horizon signal your approach to this unique animal paradise. South Georgia is often referred to as the “cold Serengeti”. Hundreds of thousands of king penguins blanket the island’s coastlines and mountain slopes. On numerous trips and landings with the Zodiacs, you will experience the animal world from a respectful distance. With a little luck, you will see elephant seals fighting over a harem or gentoo and king penguins in their natural habitat. Your experts, who have extensive experience in the Antarctic, will familiarise you with the flora and fauna. The pioneering days of polar research will come to life for you in Grytviken: in the former whaling station, you will visit the grave of Sir Ernest Shackleton and commemorate the heroic efforts with which he once saved his crew.

Arrives On: 08 Jan 28

Day 10: South Orkney Islands (South Orkney Islands)

The South Orkney Islands, a small group of islands with a surface area of around 620 km² (239 mi.²), are located in the Scotia Sea. A lonely, glaciated world with ice deserts – and more animal species than on the Galapagos Islands, as scientists have discovered. Who would guess there are around 1,200 animal species here? The South Orkney Islands are home to numerous varieties of penguin, whale and seal, as well as leopard seals. With luck, you will also see icebergs drifting off the rugged coast. In contrast, the Argentinian Orcadas research station – which has been staffed since 1904 – houses just a few people. Depending on the conditions and approval from the station, you will land in the Zodiacs to gain an impression of the isolated life of polar explorers in the area.The South Shetland Islands form a long chain in the ocean. The island group opens up exciting chapters of Antarctic exploration and provides expert insights into geology. Here, your small manoeuvrable ship can again prove its expedition capability when it sails into the flooded caldera of the extinct volcano that forms Deception Island. Flanked by rock faces up to 50 m (164 ft) in height, the black sand in front of you gives off steam as a testament to a past eruption – and you in the heart of the scenery. Elephant Island, where history surrounds you, is legendary: polar explorer Sir Ernest Shackleton and his crew spent months here after abandoning their ship in the ice. You, too, will be enchanted by the scenery. Jagged crags loom fiercely on the horizon and the evening sun casts a delicate pink glow over the snowfields.The Antarctic Peninsula, part of the coldest continent on Earth, may seem inhospitable at first glance, but it is actually a paradise for countless animal species that have adapted perfectly. Enjoy unforgettable moments when, for example, you set foot on the Antarctic mainland near to Paradise Bay. Snow-covered peaks, imposing icebergs and towering glaciers surround you. Unbelievable views also await you in the bay of Neko Harbor with its rocky massifs. On Petermann Island, keep an eye out for gentoo and Adelie penguins and the blue-eyed cormorants that have their breeding colonies here. One of the most impressive shipping passages in the world is the Lemaire Channel: mountains up to 1,000 m (3,281 ft) high line the strait of water.As the ship heads south, the endless white seems increasingly rough and icy. The excitement on board mounts as you approach the crossing of the

Antarctic Circle – a unique feeling of pioneering adventure. How far can the ship advance? Thick ice fields and icebergs are a common sight here and the glaciers seem more dominant. In this challenging region, the experience and flexibility of the captain and crew are needed more than ever.With the highest ice class for passenger ships, the ship can forge its way to the most beautiful and rarely visited regions such as Marguerite Bay. A steep mountain panorama, possibly covered in fresh snow, as well as vast snowfields and glaciers spread out before you. On Zodiac rides and hikes with your experts, you will gain insights into a world of ice that few have experienced. Simply magical.

Arrives On: 12 Jan 28

Day 19: Port information not found

Arrives On: 21 Jan 28

Day 21: Ushuaia (Argentina)

Arrives On: 23 Jan 28
